

Subtype sample distribution and TGS grouping

Biological subtype annotation

Luminal A

ER-positive luminal program
ESR1, PGR, FOXA1, GATA3, MLPH

Luminal B

Luminal/proliferative program
ESR1/PGR axis, MKI67, AURKA

HER2-enriched

HER2-amplified program
ERBB2, GRB7, PGAP3

Basal-like

Basal/epithelial program
KRT5, KRT14, KRT17, EGFR, FOXC1

Normal-like

Normal-like epithelial context
Luminal and stromal-like signals

Total samples: 875. TGS groups are assigned from class frequency.
