

Subtype sample distribution and TGS grouping

Biological subtype annotation

Normal-like

Normal-like/stromal context
CNN1, MYH11, LMOD1-like signals

Basal-like

Basal/epithelial program
FOXC1, KRT5/14/17, EGFR-related axis

HER2-enriched

HER2-amplified program
ERBB2, GRB7, PGAP3

Luminal A

ER-positive luminal program
ESR1, PGR, FOXA1, GATA3, MLPH

Luminal B

Luminal/proliferative program
ER axis with cell-cycle activity

Total samples: 875. TGS groups are assigned from class frequency.
